Technical Skills

Languages and Databases: HTML, CSS, JavaScript, React. Tailwind CSS, Bootstrap, Python, Django, Postman, SQL, MySQL

Soft Skills: Communication, Leadership, Teamwork, Adaptability, English Language

Projects

BookLeader – Library Management System

Description:

Developed a comprehensive Library Management System to streamline book borrowing, tracking, and management processes. The system enabled efficient cataloging, user registration, book lending/return, and overdue fine management.

- Developed the user interface and backend functionalities using HTML, CSS, JavaScript, Python, Django, PostgreSQL.
- Integrated search functionality for books and users with filters for efficiency.

- Designed and implemented a database schema for managing books, users, and transactions.

Blog Website [Link](#)

- Developed comprehensive Create, Read, Update, and Delete functionalities for blog posts, allowing users to manage their content effectively.
- Implemented secure user authentication and registration mechanisms, ensuring that only authorized users can access and modify content.
- Enabled efficient organization of blog posts by implementing category management features, allowing users to categorize their content appropriately.
- Utilized Django Rest Framework to build a RESTful Framework to build a RESTful API, facilitating seamless communication between the front-end and back-end of the application.

Ecommerce Website - Front End Development [Link](#)

- Frontend Development using React for creating interactive and responsive user interfaces.
- Product catalog, shopping cart functionality. Created a product catalog with features like search, and sorting.

Business Website [Link](#)

- Developed a fully functional static website for hotel using only HTML and CSS
- Designed and implemented features like a homepage, services section, gallery, and contact form.

Training/Certifications

Full stack Development with Django (Dursikshya Education Network)

- Basic to Advanced Concept of two programming language JavaScript and Python.
- Usage of their framework and library like React in frontend and Django in backend.
- Build real project like ecommerce and blog using Django rest framework for Api creation and react for client side.

Education

Tribhuwan University

B.E, Bachelor in Computer Engineering

National College of Engineering | Aug '19 – May '24
